Manitoba Mineral Development and Geoscience 2019-2020

Principal Geology and Mineral Development Map of Manitoba

Mining and Petroleum Sector Overview 2017

- Largest primary resource industry of Manitoba's economy
- \$2.5 billion in total value of production (preliminary estimate), up 17% from previous year
- Accounts for approximately 3.3% of the province's nominal GDP (basic prices) and 2.5% of international exports of goods
- Direct employment of approximately 6,200 people
- Estimated \$537.5 million in capital expenditures on development
- 2018 exploration expenditures forecast of \$54.7 million, up 42% from 2017

- Major producers: Vale (nickel, copper); HudBay (copper, zinc); Tantalum Mining Corporation of Canada (cesium)
- 240 new wells drilled in 2017, up 196% from previous year

In 2017, Manitoba produced:

- 39.2% of Canada's zinc
- 10.9% of Canada's nickel
- 6.6% of Canada's copper
- 2.7% of Canada's gold
- 11.6% of Canada's silver
